KARTIK GUPTA

SOFTWARE DEVELOPER FRESHER

Gurgaon Haryana, itskartik098@gmail.com, 7042319289

Backend Developer specializing in Spring Boot and REST APIs, with experience in building scalable, secure, and high-performance web applications.

SKILLS

- Core Java
- Advance Java
- Spring Boot
- Hibernate

- Aspect Oriented Programming
- Spring Data JPA
- Spring Security
- Microservices

- Database - MySQL , Postgres
- Postman
- AWS

PROJECTS

User Review System

Developed a backend application using Spring Boot where users can submit movie reviews along with ratings and related details. Integrated the system with IMDb API to fetch and display official ratings, ensuring accurate comparison with user reviews.

Email Sender Application

Designed an Email Sender Application that allows users to send emails with plain text, HTML content, and file attachments. The system supports multiple recipients, rich text formatting, and conditional handling for attachment-based or normal emails.
